

Environmental Policy

Aerospace and Controls Technology recognises that its activities have an impact on the environment and the importance of minimising these where possible. The following are key points that will be the base of its strategy in achieving this

- Minimise waste by evaluating operations and ensuring they are as efficient as possible.
- Promote recycling both internally and amongst its customers and suppliers.
- Source and promote a product range to minimise the environmental impact of both production and distribution.
- Meet or exceed all the environmental legislation that relates to the Company.

Signed: _____

A handwritten signature in black ink, appearing to read 'P. Martin', is written over a horizontal line.
